

CM-1200 / CM-2400 Safes

Cash that is sitting in your cash registers is a major risk to your company, whether that risk comes from external or internal sources. The ability to secure your cash directly at the point-of-sale is vital to any loss prevention or cash management system. Dunbar's integrated cash management solutions allow your managers to remain active on the sales floor concentrating on their most important priorities – managing your employees and serving your customers – while the safe takes care of the rest.

Patented Dual Door Design

This unique safe design allows cash to be secured in a separate locked compartment accessible only by Dunbar. A separate top door access allows the unit to be serviced without giving access to the secured deposits. With management access to the top door, simple jams and cleaning can be addressed and resolved immediately to ensure maximum uptime.

Independent Operations

Each safe functions independently eliminating the need to network multiple safes to a main safe host unit. Our online reporting will consolidate and total drops by cashier and location.

3G Wireless Communication

Built-in wireless 3G technology provides you with detailed, real-time transaction-by-transaction reporting. Our industry-leading wireless communications allow us, in conjunction with partner banks, to facilitate Dunbar Advanced CreditSM that provides credit to your bank account for funds that remain validated and secured within your safe. Additionally, two-way communication between your safe and Dunbar allows for remote diagnostics and upgrades to your safes.

Cash-Aware[®] Online Reporting

Access real-time online reporting through our secure Dunbar Valu-Trak[®] web portal 24/7, 365 days. Reports are accessible using a secure log-in and provided in PDF, Excel or CSV file output for reconciliation. All safe activity and data is stored on our dedicated SQL server.

CM-1200 Safe Specifications
Single Bill Reader & Cassette
1,200 Note Capacity
6.75" W x 16"D x 31" H

CM-2400 Safe Specifications
Dual Bill Reader & Cassette
